▶ Video 1: Installing Gnucash

 GnuCash can be installed on various types of operating systems including windows, Mac and Linux . It is also available for earlier operating systems as well as the most recent operating systems . GnuCash is a free open source accounting software which can be freely downloaded at the GnuCash.org. In this tutorial I will walk you through the steps of installing GnuCash on a Windows desktop computer.

Instructions:

Windows Installation:

Download the installer: Go to the official GnuCash website and download the latest stable release for Windows.

1. **Run the installer**: Locate the downloaded .exe file and double-click it to start the installation process.

2. **Follow the prompts**: Follow the instructions in the installation wizard to complete the installation.

Mac Installation

1. **Download the installer**: Go to the GnuCash website or the Sourceforge/Github projects and download the correct disk image for your Mac's processor (Intel or Apple Silicon).

2. **Open the disk image**: Double-click the downloaded .dmg file to open it.

3. **Copy to Applications**: Drag the GnuCash app icon from the disk image into your Applications folder. If you need online quotes, also drag the "Install Online Quotes" icon into your Applications folder.

4. **Close the disk image**: You can now eject and close the disk image.

5. **Launch GnuCash**: Open the application from your Applications folder or by clicking its icon on your system.
